

**E58**  
**ULV COLD FOGGER**

The ULV Cold Fogger has a spray range of 10 to 25ft, making it ideal for penetrating challenging areas. With adjustable and uniform droplets, its fast spreadability, makes it ideal for disinfecting and sterilizing common areas. The solution pipe and air pipe are corrosion resistant, and its head is crack resistant and shockproof. Patented technology prevents the solution from flowing back. The inclusion of the frequency-conversion motor and adjustable delivery lift make it more efficient, enabling you to use less solution.
